

AIRCOOLER PRO

Product price:

€44.90 tax included

ALL IN ONE! AIRCOOLER Pro is a silent all-in-one ventirad designed to effectively cool any high-end AMD or Intel processor. This kit consists of a double radiator, a design shell with an addressable RGB connector and a 92 mm PWM fan.

OPTIMUM PERFORMANCE: The processor is one of the most heat-emitting components in your case. Installing an AIRCOOLER PRO kit will allow you to effectively cool your CPU and thus preserve your PC, its components and increase its performance. AIRCOOLER PRO is compatible with the following motherboards: Intel, sockets: LGA115X / LGA775 and AMD, sockets: FM2 / FM1 / AM4 / AM3+ / AM3 / AM2 / 940 / 939 / 754

WHAT'S UP? It's simple! The radiator is placed on the processor using one of the included AMD or Intel supports. The 4 6 mm copper pipes, in direct contact with your processor, will accelerate thermal conductivity. The double radiator and its fan will actively participate in heat dissipation.

AIRFORCE 92 MM PWM The radiator cooling is optimized by its PWM fan (4 pins). What does PWM mean? This is the abbreviation of "Pulse Width Modulation" (Modulation with pulse duration). Unlike standard fans (3 pins) whose rotation is constant, the PWM technology allows faster or slower rotation depending on the needs of your system. To summarize, if your system needs to be cooled then the fan will rotate at full speed and at contrario more slowly if the activity of your PC is weak.

RGB ADDRESSABLE: Not only does AIRCOOLER PRO offer high performance cooling but also a customizable backlight solution of its design hull. In fact, the 3-pin / 5V addressable RGB connector included is compatible with motherboards: ASUS Aura Sync, GIGABYTE RGB Fusion, MSI MysticLight Sync and ASRock Polychrome Sync, use your motherboard software to take your hand on the colors of your setup.

**Product features:**

Cooling: Cooler model

Cooling: TDP 120W

Cooling: Addressable RGB compatible: ASUS Aura Sync, GIGABYTE RGB Fusion, MSI MysticLight Sync and ASRock Polychrome Sync

Cooling: Intel compatible: LGA115X / LGA775

Cooling: Copmpatible AMD : FM2 / FM1 / AM4 / AM3+ / AM3 / AM2 / 940 / 939 / 754

Radiator: Heat Pipes x4 / 6 mm in diameter

Radiator: Dimensions 15 x 11.4 x 8.6 cm

Radiator: Materials : Aluminium / Copper

Air force: Speed 2400 RPM

Air force: Sound level 29 dB

Air force: Static pressure 42.5 CFM

Air force: Dimensions 92 x 92 x 25 mm

Air force: PWM connector 4 pins

Contents of packaging: Aircooler PRO ARGB

Contents of packaging: Assembly kits for Intel and AMD processors

Contents of packaging: Complete screwdriver kit

Contents of packaging: Thermal paste

Contents of packaging: Complete installation manual
