

EPIC 27"

Dalle VA bluffing! Dive into an immersive gaming experience with the VA slab on the EPIC 27" screen. The rich colors and deep blacks of this technology offer you striking visuals, while ensuring wide vision angles so that every detail of your game is clear and bright.

At the heart of action... EPIC 27" has a R1500 curvature that wraps your vision, creating a captivating visual field. This soft curvature, forming an arc with a radius of 1500 mm is breathtaking: it allows you to immerse yourself completely in your game, reducing visual fatigue and placing you at the heart of the action for an unmatched gaming experience.

Ultra-to-be images With a refresh rate of 240Hz, EPIC 27" ensures exceptional fluidity, eliminating the blur of movement for ultra-tooth images. Whether you're shooting, running or jumping, your game reacts instantly to every action, giving you the competitive advantage you need.

Surgical precision! To top it all, EPIC 27" supports the HDR technology (High Dynamic Range) offering even brighter images, with stunning contrasts and bright colours. The ultra-fast response time of 1 ms MPRT ensures that you are always ahead of your opponents, ensuring exceptional responsiveness to avoid any opportunity to react. Each movement will be of surgical precision, propelling your performance at stake to new heights.

Optimum visual comfort: Discover the ultimate gamer screen that redefines the game experience with FreeSync for fluid movements, the blue anti-light to reduce eye fatigue, and a 178° vision angle for exceptional image quality. The integrated overdrive ensures fast response times, ideal for fast games, and the "Flicker Free" technology eliminates the glitter, ensuring optimal visual comfort during extended sessions. In addition, its
