

CLONE 4 ARTIC

Product price:

€79.90 tax included

BORN TO FIGHT: Clone 4 is specially designed to meet the most demanding configurations and allow full customization of your chassis, from A to Z. The interior offers several pitches to accommodate your components, such as ATX, mATX, ITX, graphics cards up to 345 mm long, and a CPU ventirad with a maximum height of 160 mm. You can mount up to 4 SSD disks.

LIGHT SHOW: Turn off the lights and press the power button! Clone 4 presents a unique luminous design. Indeed, its curved façade is equipped with an ARGB LED strip, but what attracts the most attention is its tempered glass side wall that reveals the iconic Spirit Of Gamer badge.

RGB SPECTRUM: The built-in fan will highlight your components. With 60 predefined RGB modes easily controlled via the dedicated LED button or directly from the application of your compatible motherboard (ASUS Aura Sync, RGB Fusion Ready, MSI Mystic Light Sync, ASROCK Polychrome Sync), customizing Clone 4 has never been so simple!

COLD WAR: With 8 fan locations, the Clone 4 comes with 2 pre-installed fans, an ARGB Spectrum fan in the back and a standard fan in the front. If you wish, you can also install an AIO Watercooling: up to 360 mm at the front, 120 mm at the rear or 240 mm at the top. In addition, the power compartment is designed to isolate the heat from the rest of your configuration.

ARMORED CASE: The clever design lies in the tempered glass wall of 4 millimetres mounted on hinges and opening like a window. A small discreet lock allows to open and close the wall without using tools or screws.. Live the ultimate gaming experience with the Clone 4!

Product features:

Main characteristics: Power Format (PSU)

Main characteristics: Format of the box

Main characteristics: Mother card format

Main characteristics: Number of PCI slots

Main characteristics: CPU fan height max

Main characteristics: Max graphics card length.

Panel I/O: Reset

Panel I/O: HD Audio

Panel I/O: On/Off

Panel I/O: LED indicators

Panel I/O: RGB Control

RGB Controller: Control Hub Spirit of Gamer 60 RGB modes included (4 max fans)

RGB Controller: Compatible

Pre-installed fans (included): Back

Fan slots (not included): Façade

Fan slots (not included): PSU compartment

Fan slots (not included): Above
