

# RACE WHEEL FORCE1080RS

Discover a new dimension of driving with Racing Force 1080RS! Thanks to its **1080° rotation**, dive into the heart of your favourite racing games and feel every turn with striking realism. With a **17-bit magnetic encoder** high resolution **3.2 Newton dual engine power return**, this steering wheel guarantees exceptional precision and total immersion. Whether you are a casual player or a true simulation enthusiast, the Racing Force 1080RS redefines the standards of driving experience.

An absolute control at hand, for precise and reactive control. With his **18 customizable digital buttons and magnetic sequential pallets**, your orders are always accessible in an instant. In addition **integrated LED indicators** offer you an immediate visual return of your braking and acceleration, optimizing each stroke. Extended compatibility with **PC, PlayStation and Xbox** ensures unlimited versatility, regardless of your preferred platform.

Enjoy a total immersion with the Racing Force 1080RS speed lever. His box to **6 speeds with reverse**, associated with **hand brake button**, allows you to make quick and fluid transitions, for perfect control of each situation. Whether you're driving a circuit car or an off-road truck, the **high/Low button** helps you adjust your driving in the blink of an eye, while ensuring irreproachable stability.

A XXL pedal for perfect road control. Designed to combine comfort and realism, the pedal boat **three metal pedals** offers an authentic feel at every pressure. Thanks to his **large base and its XL skates**, you enjoy unparalleled stability, even during the most intense maneuvers. Every accelerator, brake or clutch stroke becomes as fluid and precise as in a real car.

Boost your experience with the **rACING WHEEL application** ! Hey! With the automatic Bluetooth connection, configure and customize your steering
